ALL STARS **ALL-WEATHER** ALL ACTION!

INFORMATION PACK – SEASON 7

WELCOME TO SEASON 7

Welcome to Season 7 of the All-Weather Championships. Gaining in popularity year on year, the Championships are now very much the centrepiece of flat racing through the winter in Britain. Good Friday at Lingfield Park is a real pinnacle day in the British Racing calendar, attracting support from both home and abroad.

Season 6 was a fantastic year, and we were delighted to follow the likes of Mark Johnston's stars Matterhorn and Watersmeet alongside the likes of Wissahickon, trained by John Gosden and Tom Dascombe's always popular sprinter Kachy, owned by Dave and Janet Lowe.

This season, we are once again delighted to welcome back Ladbrokes and Betway as category sponsors. We look forward to working with their teams to follow the horses that compete in their categories through the Winter and to see their branding across the four ARC tracks involved in the All-Weather Championships.

Feature races under both brands include Listed races, the Ladbrokes Fleur de Lys Stakes as well as the Ladbrokes Burradon Stakes at Newcastle on Good Friday, whilst races such as the Listed Golden Rose and Cleves Stakes in the Sprint Category and the Churchill and Winter Derby Trial Stakes in the Middle Distance Category accompany the Winter Derby itself under Betway's banner.

This season, the All-Weather Championships welcome Bombardier as the new sponsor of the Mile category. Brewed at Eagle Brewery in Bedford since 1980, the All-Weather Championships is delighted to partner with such a popular brand, which will see Bombardier beer available across the ARC racecourses throughout the year, alongside their branding on the All-Weather tracks and race titles throughout the winter season.

The All-Weather Championships is always looking to evolve, and we're pleased to deliver some amendments to the Fast Track Qualifiers this year, following feedback from Horsemen along with liaison with our colleagues at Horseracing Ireland and France Galop.

In the 3-Year-Old category, the Listed Ladbrokes Spring Cup at Lingfield Park in February becomes a Fast Track Qualifier, whilst the Listed Cooley Stakes at Dundalk in November receives similar status in the Fillies & Mares Category. In addition, a new Fast Track Qualifier in the Mile Category has been established at Newcastle in January to take advantage of the hugely popular straight mile tapeta course.

2019 marks the 30th Anniversary of All-Weather racing in Britain, which will be marked at both Lingfield Park and Southwell Racecourses this season. We hope that Season 7 of the All-Weather Championships is a fitting marker of this significant anniversary year.

ALL-WEATHER CHAMPIONSHIPS SEASON 7

Season 7 of the All-Weather Championships will run from Tuesday 22 October 2019 to Good Friday, 10 April 2020 and include every all-weather race held at Chelmsford City, Kempton Park, Lingfield Park, Newcastle, Southwell and Wolverhampton over that period.

The All-Weather Championships celebrates its stars at Lingfield Park on Good Friday 2020, with a seven race, £1,000,000 card. It features the six All-Weather Championship Finals, as well as the hugely popular and competitive handicap for apprentice jockeys.

In addition, the All-Weather Championships hosts Good Friday racing at Newcastle, with £175,000 in prize money available. A new addition to Good Friday 2020 will be the £100,000 card at Chelmsford City, rounding off the season.

As it enters its seventh season, the All-Weather Championships continues to deliver on the overarching aim of improving the race programme and prestige of all-weather racing, whilst engaging racegoers, bookmakers, punters and horsemen throughout the season with exciting sporting action.

The All-Weather Championships continue to give the sport the profile it deserves, with the practical benefits that this brings. This includes more horses staying in training over the winter, especially in the north, boosting field sizes and betting turnover, whilst adding to the varied and exciting nature of British horseracing.

QUALIFYING FOR THE ALL-WEATHER CHAMPIONSHIPS £1 MILLION FINALS DAY

There are two ways for horses to qualify for one of the Finals on All-Weather Championships Finals Day at Lingfield Park, 10 April 2020.

- A horse can win a 'Fast Track Qualifier' race which will ensure a FREE and GUARANTEED place in the corresponding Final on Good Friday. There are four Fast Track Qualifiers in each of the six categories, hosted at racecourses in Britain, Ireland and France; or
- A horse must run a minimum of three times on the all-weather surfaces in Great Britain, Ireland and France; or twice on the all-weather surfaces in Great Britain, Ireland, France and once in Dubai during the qualifying period between 22 October 2019 to 12:00 noon on 3 April 2020, and then be rated high enough to 'make the cut' in a Final by order of BHA rating.

THE CATEGORIES

3Y

3-YEAR-OLD - £150,000 FINAL

The 3-Year-Old category aims to find the best 3-year-old all-weather colts, fillies and geldings with a Championship Final over 6 furlongs (1,200m).

This category comprises of every 2-year-old race between 22 October 2019 and 31 December 2019 and all 3-year-old only races from 1 January 2020 to the end of the qualifying period.

To qualify for the Final a horse must win one of the four Fast Track Qualifiers in the 3-Year-Old category or run a minimum of three times on the all-weather in Great Britain, Ireland and France or twice on the all-weather surfaces in Great Britain, Ireland, France and once in Dubai within in the qualifying period, and be rated high enough to make the cut.

SP

SPRINT- £150,000 FINAL

The Sprint category aims to find the best 4-year-old+ all-weather sprinters with a Championship Final over 6 furlongs (1,200m).

This category comprises of every 5 furlong and 6 furlong 3-year-old and upwards race between 22 October 2019 and 31 December 2019, and all 4-year-old and upwards races from 1 January 2020 to the end of the qualifying period, excluding races confined to Fillies and Mares.

To qualify for the Final a horse must win one of the four Fast Track Qualifiers in the Sprint category or run a minimum of three times on the all-weather in Great Britain, Ireland and France or twice on the all-weather surfaces in Great Britain, Ireland, France and once in Dubai within in the qualifying period, and be rated high enough to make the cut.

MI

MILE- £150,000 FINAL

The Mile category aims to find the best all-weather Milers with a Championship Final over 8 furlongs (1,600m).

This category comprises of every 7 furlong and 8 furlong 3-year-old and upwards race between 22 October 2019 and 31 December 2019 and all 4-year-old and upwards races from 1 January 2020 to the end of the qualifying period, excluding races confined to Fillies and Mares.

To qualify for the Final a horse must win one of the four Fast Track Qualifiers in the Mile category or run a minimum of three times on the all-weather in Great Britain, Ireland and France or twice on the all-weather surfaces in Great Britain, Ireland, France and once in Dubai within in the qualifying period, and be rated high enough to make the cut.

THE CATEGORIES

MA

MARATHON - £150,000 FINAL

The Marathon category aims to find the best all-weather 'Stayer' with a Championship Final over 15 furlongs, 169 yards (3,172m).

This category comprises of every 13 furlong or further 3-year-old and upwards race between 22 October 2019 and 31 December 2019 and all 4-year-old and upwards races from 1 January 2020 to the end of the qualifying period, excluding races confined to Fillies and Mares.

To qualify for the Final a horse must win one of the four Fast Track Qualifiers in the Marathon category or run a minimum of three times on the all-weather in Great Britain, Ireland and France or twice on the all-weather surfaces in Great Britain, Ireland, France and once in Dubai within in the qualifying period, and be rated high enough to make the cut.

FM

FILLIES & MARES - £150,000 FINAL

The Fillies and Mares category aims to find the best female horse on the all-weather with a Championship Final over 7 furlongs (1,400m).

This category comprises of every race confined to 3-year-old and upwards, Fillies and Mares, between 22 October 2019 and 31 December 2019 and all races confined to 4-year-old and upwards Fillies and Mares from 1 January 2020 to the end of the qualifying period.

To qualify for the Final a horse must win one of the four Fast Track Qualifiers in the Fillies and Mares category or run a minimum of three times on the all-weather in Great Britain, Ireland and France or twice on the all-weather surfaces in Great Britain, Ireland, France and once in Dubai within in the qualifying period, and be rated high enough to make the cut.

MD

MIDDLE DISTANCE- £200,000 FINAL

The Middle Distance category aims to find the best all-weather horse over 10 furlongs (2,000m).

This category comprises of every 9 furlong to 12 furlong 3-year-old and upwards race between 22 October 2019 and 31 December 2019 and all 4-year-old and upwards races from 1 January 2020 to the end of the qualifying period, excluding races confined to Fillies and Mares.

To qualify for the Final a horse must win one of the four Fast Track Qualifiers in the Middle Distance category or run a minimum of three times on the all-weather in Great Britain, Ireland and France or twice on the all-weather surfaces in Great Britain, Ireland, France and once in Dubai within in the qualifying period, and be rated high enough to make the cut.

CHELMSFORD CITY

BUILT: 2008 NEW TRACK AND GRANDSTAND BUILT IN 2014
TRACK: POLYTRACK
TRACK LENGTH: 1M OVAL
FEATURES: BHA DESIGNED OVAL

Chelmsford City Racecourse (CCR) opened in January 2015 and is the only horseracing venue in Essex.

The racecourse consists of an 8 furlong left-handed oval with large 135m+ sweeping bends. The track measures 22m in width and finishes with a 2 furlong home straight.

Over £600,000 has been spent on upgrading the racing surface since the racecourse opened, including a re-wax of the Polytrack to enhance its binding properties, the addition of a chute to create the popular 7f start, and in 2018 a replenishment of fibre through the whole track profile. Average field sizes have continued to increase year on year as a result of these improvements.

The track investment has enabled CCR to schedule 59 fixtures in 2020 and also helped attract high quality racing to the course. Its racing programme currently contains the highest percentage of Class 1-4 AWT races in Britain and generous prize money will continue to be a top priority.

2019 has seen the venue again host one of the most valuable evening fixtures in British racing history, as well as staging its first ever Heritage Handicap, the 7f £100,000 Chelmsford City Cup. In a year of firsts, CCR also ran another new Listed race, the £55,000 Chelmer Stakes for fillies in May, as well as the £60,000 Cardinal Stakes, a key qualifying race for the Kentucky Derby.

As well as catering for elite horses, care is taken to ensure prize money is spread across the whole spectrum of equine participants, with most Class 4 to 6 races being run at near to BHA's maximum permitted levels. In 2020, CCR will host its first ever Good Friday fixture, with a six figure card catering for runners of all abilities.

ON the facilities front, work continues on the new turf course, which will complement the all-weather track and provide additional start options for horsemen from 2021.

KEMPTON PARK

BUILT: 1878
TRACK: NEW POLYTRACK IN 2006
 (Refurbished 2015, 2016 & 2018)
TRACK LENGTH: 10F (OUTER) AND 8F (INNER)
FEATURES: FLOODLIT OVAL

Kempton Park opened for racing in 1878 when businessman Henry Hyde passed the site in Sunbury on Thames and identified it as the perfect location for a new racecourse in the UK.

Located within the historic jump track, the ten furlong, oval polytrack is right-handed with a bend radius of 137m. The track is 20m wide in the home straight with a false rail at the 2nd pole which helps a trouble free passage to the winning post.

Kempton Park also boasts the first fully retractable floodlighting system used on a racecourse. Of the 42 floodlights that illuminate the track, 28 of the poles have the ability to lay flat to the ground - ensuring the view of daytime flat and jump racing is not compromised.

Refurbished in 2015, 2016 & 2018 - by British company Martin Collins Enterprises, who designed the surface specifically for Kempton Park - In 2015 & 2018 2000 tonnes of original specification polytrack with additional fibre and wax was added to the course and in 2016, 56 tonnes of wax and 48 tonnes of CLOPF fibre were added. This continued investment has rejuvenated the track and extends its performance and longevity.

LINGFIELD PARK

BUILT: 1890
TRACK: NEW POLYTRACK IN 2012
TRACK LENGTH: 1M 2F
FEATURES: SHARP, WITH SOME DOWNHILL

Lingfield Park's track was resurfaced with polytrack in October 2012. Along with the construction of the grandstand and a Marriott Hotel in 2010 this placed Lingfield Park firmly on the map as a major racing, conference and leisure destination with excellent facilities.

Lingfield Park is the only racecourse in Great Britain to offer all three codes of racing - flat all-weather, flat turf and jumping. It hosts around 90 fixtures a year with highlights on the flat including the All-Weather Championships Finals Day and Derby and Oaks Trials Day, along with the Surrey National over the jumps in February.

Located in a 450-acre (1.8km) estate and opened in 1890 by the Prince of Wales (later King Edward VII), who also agreed to let Lingfield Park incorporate the Prince of Wales feathers into its official heading, the course initially held Jumps Racing only. In 1894 The Jockey Club granted permission for flat racing to be held and it has continued ever since.

In 1982 the new owners installed flood defences on the estate to alleviate flooding. A golf course was developed and this opened in June 1987. Arena Leisure Plc purchased the course in 1991 and in 2001 made the decision to replace the Equitrack all-weather surface with Polytrack, opening later that same year.

The all-weather track runs around the inside of the turf. It is a left-handed loop and follows much the same line as the turf course in the home straight and the back straight, but turns sharply for home at the end of the back straight and is 1m 2f in length. The track gently rises to a slight hill at the start of the back straight before running downhill around the bottom corner and into the home straight where it levels off. The result is that the 1m, 7f, 6f and 5f starts are all downhill which contributes to Lingfield being the sharpest of the all-weather tracks.

NEWCASTLE

BUILT: 1882
TRACK: NEW TAPETA IN 2016
TRACK LENGTH: ROUND COURSE 1M 6F,
STRAIGHT COURSE 1M
FEATURES: LEFT-HANDED ROUND TRACK,
STRAIGHT MILE, GALLOPING TRACK

Steeped in history, there has been horse racing in Newcastle since the 17th century and this has been staged in High Gosforth Park for the past 135 years.

This is Newcastle's third season as part of the All-Weather Championships. The £12 million conversion of its turf flat course into a world class Tapeta surface means that there is now an all-weather track in the north of England.

The Tapeta track was officially opened in May 2016, and has received wide spread praise from jockeys and trainers as an excellent, fair and safe racing surface.

The track provides horses with the chance to experience a wide, galloping track including the only straight all-weather mile in the world.

Since the introduction of the Tapeta, Newcastle has already welcomed a number of superstars through its gates, including Investec Oaks, King George VI and Queen Elizabeth Stakes and dual Prix de l'Arc de Triomphe winner Enable, St James' Palace Stakes winner Without Parole and Ascot Gold Cup, Goodwood Cup and Yorkshire Cup winner Stradivarius.

Racing on Good Friday at Newcastle started in 2017, with the highlight the £100,000 Burradon Stakes, a now Listed race for 3-year-olds, run over a mile. Richard Fahey's Forest Ranger was victorious in the race's first year, with Phoenix Thoroughbred's Gronkowski the winner in 2018. Gronkowski went on from Newcastle to finish second behind the unbeaten US Triple Crown winner Justify in the Belmont Stakes in June.

SOUTHWELL

BUILT: 1898
TRACK: FIBRESAND
TRACK LENGTH: 1M 2F
FEATURES: FIBRESAND SURFACE

Southwell Racecourse has been hosting horseracing meetings since 1898. The racecourse now holds 68 fixtures a year, both on the flat all-weather track and the National Hunt turf course.

Located near Newark-on-Trent, and set in 145 acres of beautiful Nottinghamshire countryside it is one of the six all-weather tracks in the UK, with a unique Fibresand surface - a mixture of sand and elastic fibres.

In October 2016 the Fibresand on the back straight underwent £120,000 worth of refurbishment work in order to improve the drainage and provide an optimal race surface.

The all-weather track is a left-handed oval with tight bends at either end and a long 3f straight on the main run in. It runs around the outside of the National Hunt turf course. The oval is a mile-and-a-quarter for the round course with the bends having a slight camber built into them. The 2f spur means Southwell can run straight 5f races, the second longest all-weather straight in the country after Newcastle's one mile straight.

In March 2019, the installation of state-of-the-art LED floodlights at Southwell was completed, allowing evening racing to take place at the Nottinghamshire track for the first time.

WOLVERHAMPTON

BUILT: 1887
TRACK: NEW TAPETA IN 2014
TRACK LENGTH: 1M
FEATURES: FLOODLIT

Located on the outskirts of Wolverhampton City Centre at Dunstall Park, Wolverhampton Racecourse was Britain's first floodlit racetrack, and brings you the thrills of racing day and night. Wolverhampton hosts around 80 fixtures a year.

Wolverhampton has hosted horse race meetings since 1887. The racecourse moved to the current Dunstall Park venue at the end of the 1920's, originally hosting both jump and flat racing on turf.

In 1993 there was a complete overhaul of the track and a Fibresand surface was laid alongside the turf track. Floodlights were also added to allow for evening racing. History was made when the first ever British horserace took place under those floodlights in 1993.

In 2004 the Fibresand and turf tracks were replaced by the current Polytrack surface. The course is an oval of just over 1m in circumference with tight left-handed turns and a short run in. The course also has additional chutes for 6f and 7f races.

A new Tapeta surface was installed in August 2014. At the time this was the first Tapeta racing surface in Europe and its introduction has been widely praised by trainers and jockeys who report it to be a safe and fair racing surface for horses. Such was the success at Wolverhampton that Tapeta was chosen for Newcastle's new all-weather surface which opened in 2016.

Tapeta uses a selection of specifically blended fibres, waxes, PVC and sand to a depth of up to seven inches. The first Tapeta surface was pioneered by Michael Dickinson and his wife Joan Wakefield over fifteen years ago. Four other racecourses use Tapeta; Newcastle in the UK, Golden Gate Fields and Presque Isle Downs in the USA and Tapeta Park in Tasmania.

SPONSORSHIP & MARKETING

The All-Weather Championships represent a fantastic opportunity for our sponsors to showcase their brand and engage with customers.

Enhanced promotion will continue to encourage racing fans to engage with the All-Weather Championships via the bespoke All-Weather Championships website (www.awchampionships.co.uk) and social media (#awchamps).

There will be extensive promotion by the racecourses and our media partner Sky Sports Racing and attheraces.com, including a weekly round-up show and special features.

OUR MEDIA PARTNER

We are proud to work with Sky Sports Racing and attheraces.com as our media partner.

attheraces.com

Sky Sports Racing is the UK's largest, dedicated horse racing TV channel and is produced at Sky's studios alongside all other Sky Sports channels.

The channel is available in 14 million multi-channel homes across the UK and Ireland at no extra cost to Sky and Virgin Media subscribers. It is home to over 700 UK fixtures per year, including Royal Ascot, the William Hill St Leger Festival, Boodles Chester May Meeting and every race from the All-Weather Championships. Sky Sports Racing is watched by over 2 million different viewers each month and on average by around 300,000 viewers each day (BARB/Nielsen).

Attheraces.com and the At The Races app form the UK and Ireland's leading digital platform for horse racing. They generate up to 13 million user sessions per month (Google Analytics) and attract over 500,000 followers on social media channels.

SECTIONAL TIMING & IN-RACE DATA

The All-Weather Championships has been proud to be at the forefront of the introduction of sectional timing and detailed in-race data for over four years.

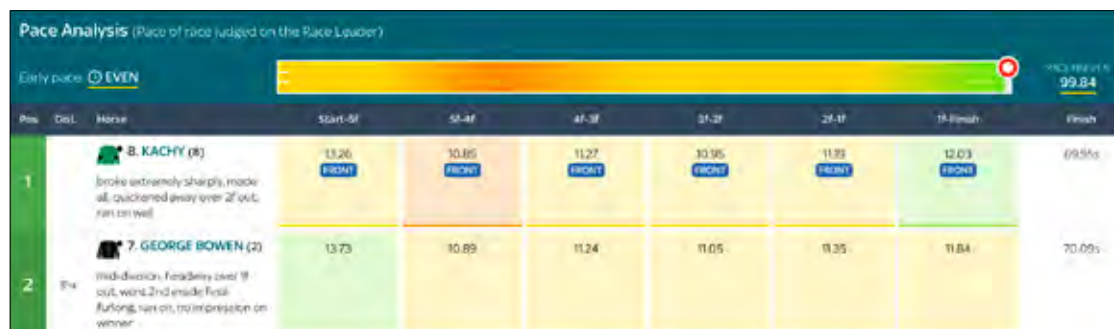

In conjunction with our partners At The Races and Total Performance Data, we have been able to shine a light on the incredible amount of exciting statistical information available in racing. Sectional Timing offers in-race speed information per runner throughout a race allowing fascinating stories to unfold way before the horses reach the finish line with the data analysing the way a race is run, rather than just the result of it.

For the fifth consecutive season of the All-Weather Championship, Total Performance Data will provide Sectional Times from all races on the four ARC all-weather racecourses - Lingfield Park, Newcastle, Southwell and Wolverhampton. All the data will be available, free of charge, on At The Races online.

We are, once again, proud to be leading the field in this area along with Total Performance Data and At The Races.

In addition to sectional times, TPD and ATR also now publish data on each individual horses average stride length and frequency, to give punters, racegoers and horse men an even closer insight into their performance.
